

# LifeLink Blood Platform - System Workflow & Specification

National Blood Transfusion Council (NBTC) Accredited Grid • Source Design: Stitch #13012171430098445569

| ACCREDITATION      | STACK                | DESIGN SYSTEM           | REPOSITORY STATUS  |
|--------------------|----------------------|-------------------------|--------------------|
| NBTC Regional Grid | React 18 + TS + Vite | Stitch Fidelity Palette | Main Branch Pushed |

## 1. Executive Summary & Core Mission

The **LifeLink Blood Platform** is an institutional digital system engineered for regional blood bank logistics, voluntary blood donor management, emergency hospital trauma unit requisitions, and national council compliance oversight. Built strictly following the **Stitch Design System** specifications, the platform delivers high-speed, zero-friction blood unit allocation with real-time cold-chain tracking.

## 2. Core 5-Stage Requisition & Allocation Workflow

| STAGE   | NAME             | OPERATIONAL DESCRIPTION                                                              | SYSTEM SLA / VERIFICATION         |
|---------|------------------|--------------------------------------------------------------------------------------|-----------------------------------|
| Stage 1 | Requisition      | Hospital/Patient submits requirement specifying blood group, component & urgency.    | Code Generated e.g. REQ-2026-8812 |
| Stage 2 | Vault Match      | Coordinator Console verifies vault stock availability and blood group compatibility. | Safety Margin > 15% Verified      |
| Stage 3 | Cryo Packaging   | Units retrieved from storage vaults (Vault A-1, Cryo) and packed at 4°C.             | Temperature Log Enclosed          |
| Stage 4 | Express Dispatch | Ambulance dispatched with real-time GPS tracking and live telemetry updates.         | Avg Dispatch: < 18 Mins           |
| Stage 5 | Handover & Log   | Hospital OT reception confirms receipt; automated AIP-160 audit log recorded.        | Status: FULFILLED                 |

## 3. Persona Operational Matrix & Module Mapping

| ROLE / PERSONA  | PRIMARY PORTAL MODULES                                                                                                                                | KEY WORKFLOW ACTIONS                                                                                                        | COMPLIANCE OUTPUT                                                                             |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| Voluntary Donor | <ul style="list-style-type: none"><li>Donor Dashboard</li><li>Donor Profile</li><li>Active Requests</li><li>Donation History</li></ul>                | Check eligibility countdown, schedule donation slots, view health metrics (Hb, BP, weight), respond to urgent local calls.  | <ul style="list-style-type: none"><li>Digital Donor Pass</li><li>PDF Certificate</li></ul>    |
| Requester / ER  | <ul style="list-style-type: none"><li>Requester Dashboard</li><li>Requisition Form</li><li>Live Request Tracker</li><li>Requisition History</li></ul> | Submit clinical requisitions (PRBC, Platelets, FFP), set urgency levels, track ambulance dispatch live via code.            | <ul style="list-style-type: none"><li>5-Stage Timeline</li><li>Cold-Chain Log</li></ul>       |
| Coordinator     | <ul style="list-style-type: none"><li>Dispatch Desk</li><li>Vault Inventory</li><li>Expiry Alerts (24h)</li><li>Donor Verification</li></ul>          | Match vault stock, authorize unit release, adjust vault inventories, monitor 24h/72h expiry risks, verify donor screenings. | <ul style="list-style-type: none"><li>Dispatch Clearance</li><li>Vault Stock Matrix</li></ul> |

|              |                                                                                                                                               |                                                                                                                              |                                                                                             |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| System Admin | <ul style="list-style-type: none"><li>Admin Dashboard</li><li>System Oversight</li><li>User Management</li><li>Audit Logs (AIP-160)</li></ul> | National grid oversight, assign user roles/permissions, review immutable security logs, set auto-dispatch safety thresholds. | <ul style="list-style-type: none"><li>AIP-160 Log Trail</li><li>Regulatory Config</li></ul> |

#### 4. Technical Specifications & Repository Metadata

- Technology Stack:** React 18, TypeScript, Vite v8, Tailwind CSS v4 (@tailwindcss/vite), React Router v7, Lucide Icons.
- Design System Alignment:** 100% fidelity with Stitch Project projects/13012171430098445569.
- API Integration Layer:** Axios client abstraction (apiClient) with isolated mock service methods.
- Empirical Build Status:** Verified with 0 errors via npx tsc --noEmit and npm run build.
- Live Local Server:** http://localhost:5173/
- GitHub Repository:** <https://github.com/akaashbytes/Blood-bank-and-Emergency-Donar-recommendation-System.git>
